Operations and Project Management Executive

Program Management | Process Optimization | SaaS Implementation | Client Success

A versatile, analytical, and results-oriented Operations and Program Management Leader with 10 years of progressive experience delivering impactful technology solutions and optimizing processes within Fortune 500 (Walmart, Uber) and growth-stage SaaS companies. Proven ability leading complex software implementations, enhancing platform operations, managing client success, mitigating risk, and driving cross-functional collaboration across Retail, Transportation, and Technology sectors to improve efficiency and user satisfaction.

PROFESSIONAL EXPERIENCE

Walmart, Atlanta, GA

2022 to Present

[Walmart, Inc.](#) (NYSE: WMT) is a multinational retail corporation operating hypermarkets, discount department stores, grocery stores, and eCommerce platforms globally. Walmart employs approximately 2.1 million associates worldwide and generates \$681b in annual revenues.

Manager, Operations

Reporting to a Senior Manager, Operations, responsible for driver earnings experience strategy, proactive platform enhancement, and operational defect resolution for ~1M daily contract drivers. Accountable for hiring and leading a 2-person analyst team focused on minimizing legal/financial risk and improving driver satisfaction.

- **Reduced earnings-related driver support contacts (Contacts Per Order - CPO) 65% YoY** by identifying and driving resolution for systemic payment defects.
 - **Led cross-functional workstreams to resolve 30+ high-priority (\$3M+ potential risk/cost) and 100+ minor earnings system defects**, safeguarding against significant legal and financial exposure.
 - Managed communications and analysis for sensitive escalations involving Legal, PR, and executive leadership.
 - Led business requirements and operational readiness for the "Fast Funds" instant pay feature in partnership with Product, Engineering, and UX teams, **increasing driver Net Promoter Score (NPS) to 4.3/5**.
 - Served as the Business Lead within the cross-functional development team, defining requirements and ensuring alignment with driver experience goals.
 - Expanded role scope from reactive defect management to proactive Business Lead for all driver earnings-related product development and enhancements; hired a specialized 2-person analyst team, building from the ground up.
 - Managed earnings-related operational readiness and driver communication strategy for major platform changes, including a new ACH payment integration and automated incentive systems.
 - Established Standard Operating Procedures (SOPs) for earnings defect identification, triage, and resolution.
-

Uber, Atlanta, GA

2020 to 2022

[Uber Technologies, Inc.](#) (NYSE: UBER) is a global technology company offering ride-hailing, food delivery through Uber Eats, and freight transport services. Uber employs 31.1k people and generates \$43.98b in annual revenues.

Project Manager, Transit

Reporting to the Operations Manager, responsible for the end-to-end deployment of Uber for Business (U4B) and legacy Routematch software solutions for public transit agency clients following Uber's acquisition of Routematch.

- Served as the primary client point of contact post-sale, overseeing and managing the end-to-end software deployment lifecycle for ~5 public transit agency clients, integrating U4B and Routematch platforms post-acquisition and ensuring successful client onboarding and transition to support teams within an 8-week target timeframe.
- Indirectly led cross-functional teams including technical consultants, product liaisons, and training personnel to meet project milestones.
- **Transformed Cape May County's Fare Free Transportation program** by deploying Uber's on-demand platform, eliminating a 3-day advance booking requirement and enhancing service accessibility for riders through successful U4B/Routematch implementation.
- Championed critical client feature enhancements, such as agency booking capabilities and voucher programs, translating transit agency needs into actionable requirements for U4B product development teams.
- Directed troubleshooting and resolution processes for client-specific technical issues and bugs within U4B and Routematch environments, ensuring minimal disruption to deployment.

Routematch Software, Atlanta, GA

2018 to 2020

[Routematch Software](#), [acquired by Uber in 2020](#), develops transportation software providing transportation data management, dispatch, and trip booking. Routematch employs 160 people and generates \$25m in annual revenues.

Project Manager, Payment Solutions

2019 to 2020

Reporting to the Director of Professional Services (PMO), initially responsible for managing projects focused on the Core Para Transit Payment Solution (online software and mobile app) then expanding ownership across all product lines.

- Deployed and managed technical resources (developers, project managers, technical leads), maintained project roadmaps, timelines, and budgets, and held ultimate responsibility for product delivery and client success.
- Served as the primary client-facing point of contact for the Payment Solution, collaborating closely with Product Owners, Technical Leads, Front End, Back End, and QA Engineers to ensure newly developed features met client requirements and timelines.
- As projects evolved, partnered with the CTO and Development team to evaluate the feasibility and budget implications of client change requests. Utilized JIRA for tracking feature requests and bug reports, incorporating common themes into the product roadmap.
- Managed relationships with outside vendors and strategic partners to ensure smooth integration.

Project Manager, Government Agencies

2018 to 2019

- Within the Project Management Organization (PMO), responsible for managing hardware deployments for transit agencies in major cities as well as rural areas.
- Served as subject matter expert and primary point of contact for government clients interested in implementing Interactive Voice Recognition hardware and software systems.
- Responsible for the configuration and validation of Routematch software based on each client's specifications.
- Contributed to sprint retrospectives and post implementation reviews to identify ways to improve the client experience, increase efficiency in implementation, and reduce configuration errors.

Naranga, Atlanta, GA

2017 to 2018

[Naranga](#) is a leading provider of franchise operations software, specializing in centralized operations management platforms, field auditing, and management solutions. It employs 80 people and generates \$10m in annual revenues.

Implementation Specialist

Reporting to the Chief Operating Officer, responsible for client onboarding, project management, data migration, systems implementation, end user training, and overall customer success for the company's SaaS product offerings.

- Led greenfield implementations for newly created or growing Franchise organizations providing a best in class SaaS solution that enabled rapid expansion and platform stability at scale.
- Managed the overall workflow for roughly 25 concurrent implementations performing workflow assessments and optimizations after each implementation to improve efficiency, client satisfaction, and implementation success.
- In partnership with the development team used the Agile Development Methodology through the onboarding, implementation, and go-live processes on a weekly sprint cadence.
- Created new company guidelines around the data migration process resulting in a 35% reduction in time to go live for new clients and refined the new client training process based on lessons learned in previous implementations.

National Research Corporation Health, Atlanta, GA

2016 to 2017

[NRC Health](#) (NASDAQ: NRC) is one of the nation's largest healthcare performance improvement firms, supporting more than 7,200 healthcare organizations. NRC employs 352 people and generates \$92.5m in annual revenues.

Implementation Manager

Reporting to the Director of Client Services within the Client Experience line of business, responsible for implementing NRC's Reputation Management products for clients across the country.

- Implemented the Reputation Management suite across 42 clients with an average time to go-live of 60 days depending on the complexity of the implementation.
- Managed accounts with recurring revenues of \$2m, acting as the primary point of contact during and post implementation with a focus on creating an exceptional customer experience.
- Used Google Chrome Developer tools as well as JavaScript, HTML, CSS, and existing SQL Server data to create mockups of what client webpages would look like post implementation.
- Led new client kickoff presentations to client executives, conducted end user training on the Reputation Management platform, and assisted in ongoing support when clients needed help resolving issues.

Perficient, Detroit, MI & Atlanta, GA

2014 to 2016

[Perficient, Inc.](#) is a consulting firm serving enterprise customers throughout North America, focusing on enterprise mobile apps, IT and platform implementations. It employs 2,700 people and generates \$498m in annual revenues.

Enterprise and Strategic Accounts Manager, East Region

Reporting to the Director of Business Development, responsible for cultivating relationships and selling technology agnostic IT Professional Services to Fortune 500 companies.

- Leveraged strategic partner relationships to develop tailored solutions for existing customers, and to establish new client relationships with Technical Directors and Vice Presidents based on those new partner-based solutions.
- Based on inbound sales and lead generation activities, partnered with senior account managers to contribute \$1m in sales opportunities to the pipeline in 2015.
- Implemented novel outreach and communication strategies to get in front of target clientele.

Micro Focus (OpenText), Troy, MI

2013 to 2014

[Micro Focus](#), acquired by OpenText, was a British multinational software and IT consulting services business based in Newbury, England. Micro Focus employed 14k employees in 43 countries and generates annual revenues of \$3.6b.

Account Manager

- Recruited to work through a 12-week Sales Academy Training program focused on developing sales leaders and teaching sales, account, and territory management best practices.
- Responsible for selling SDLC related products to clients across the Northeast, with a focus on the Tri-state area.
- Sold primarily Requirements Management, Change Management, Automated Testing, Performance Testing, and an overarching Test Management platform supporting the entire Software Development Life Cycle.
- As a core component to the sales process, responsible for leading product demonstrations, maintaining an accurate pipeline, developing sales forecasts, and maintaining a high level of customer satisfaction.

EDUCATION

MS Exercise Science- Georgia State University, Atlanta, GA – 2013

BS Exercise Science- Kennesaw State University, Kennesaw, GA – 2010
